DETAILED ACTION

Allowable Subject Matter

Claims 1-9 are allowed over prior art.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-3, the prior art fails to teach a device for identification of a detector unit in an x-ray imaging apparatus having a sensor unit in each of slots capable of detecting presence and absence of the detector units in their predetermined slots and a communication line between the sensor unit and a reading unit providing identification data concerning at least the absence of a single detector unit from its slot in the rack into the reading unit as claimed in independent claim 1.

Regarding claims 4-7, the prior art fails to teach a device for identification of a detector in an x-ray imaging apparatus having a transmitter-receiver at side of a space for an object, recognition means in the transmitter-receiver unit capable of detecting presence and absence of detector units in the space, a response unit between the transmitter-receiver unit and the reading unit providing identification data concerning the presence of a single detector unit in the space into the reading unit as claimed in independent claim 1.

Regarding claim 8, the prior art fails to teach a method for identification of a detector unit in an x-ray imaging apparatus adapted to utilize on detector unit of several units selectively for providing image data from an object through x-ray radiation by reading an identification data from a rack respective to an absence of one detector unit from the rack, feeding data files corresponding to the absent detector unit and forwarded on the basis of the identification data to

reading unit which operates at least for reading image data from the detector unit as claimed in independent claim 8.

Regarding claim 9, the prior art fails to teach a method for identification of a detector unit in an x-ray imaging apparatus adapted to utilize on detector unit of several units selectively for providing image data from an object through x-ray radiation by reading remotely an identification data from one detector unit present in a space for operation and feeding data files corresponding to the presence detector unit and forwarded on the basis of the identification data to a reading unit which operates at least for reading image data from the detector unit as claimed in independent claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
